 Name _____ Date _____

Map grid coordinates: island map

For students: each square on the map has a letter and a number, like C3. Find the letter at the top and the number on the side. Use the map, the map key and the compass rose to answer the questions. Then color the map.

Map key

- ship
- lighthouse
- mountain
- palm trees
- hut
- lake
- cave
- forest
- small island

What is in each square?

C3 _____

E3 _____

A1 _____

F5 _____

Write the square

lighthouse _____

mountain _____

hut _____

forest _____

Directions

9. Which direction is the mountain from the hut? _____

10. Which direction is the ship from the lighthouse? _____

11. Start at the lake. Go 2 squares east. What do you find? _____

12. Draw an X in square D4 to hide a treasure. Which direction is the treasure from the lake?

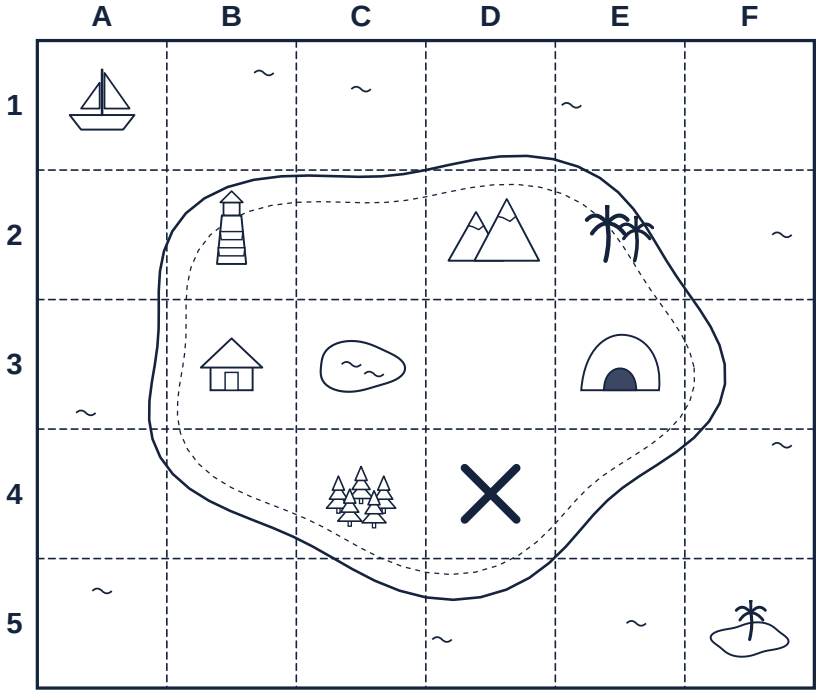

_____

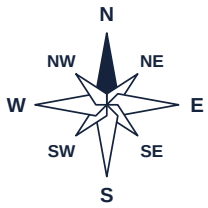

A map grid uses rows and columns so you can name a place with a letter and a number. The map key tells what each symbol means.
